

30 August 2023

Dear Business Operator

UPCOMING CHANGES TO YOUR KERBSIDE COLLECTION

Council would like to advise you of the kerbside collection changes coming in October 2023 across the Greater Shepparton municipality, for all properties with a council provided kerbside collection.

General waste bins (red) will be collected fortnightly, and food & organics bins (green) will be collected weekly. Recycling bins (yellow) will remain a fortnightly collection, alternating with the general waste bin. If your business continues to use the council kerbside collection, you will have to observe the new collection schedule.

Depending on the waste management arrangements you have in place, these changes may or may not affect your business.

If your business needs to change the way it disposes of waste, we have provided some alternative options for your consideration:

- If your business needs additional waste bins, please contact Council to order bins. Kerbside collection charges are available on the Council website.
- If your business waste needs are not being met by the change, you could obtain a quote from a Commercial waste collection company, at your own expense.
- If your business waste needs are not being met by the change, you could partner with other local businesses to look at a commercial waste solution.

For further information please contact the Resource Recovery Team on 03 5832 9700 or email waste@shepparton.vic.gov.au.

Yours sincerely

Liam Moller
