

Beveridge to Albury

Meet the contractor

Local and First Nations businesses are invited to come along and learn about supplier opportunities on the Inland Rail project in Victoria.

Work on the Beveridge to Albury section is already generating jobs for local residents and we've invested more than \$89 million with local businesses in Victoria.

John Holland is the construction contractor for the Beveridge to Albury Tranche 2 section, which includes works at eight sites between Benalla and Wandong.

The sessions will provide information on supply, workforce and training opportunities, an overview of the project and the chance to talk with the John Holland and Inland Rail teams.

Tranche 2 works include replacing road bridges, lowering rail tracks, and station modifications to enable the safe operation of double-stacked freight trains.

Construction is scheduled to start in 2025.
